

# Thingsdata.

## We are Thingsdata!

Discover the Internet of Things (IoT) with Thingsdata, your independent one stop shop for IoT. We empower organizations of all sizes to overcome the challenges of IoT. As your partner, we help you move beyond traditional business models and processes through the deployment of cutting-edge IoT technology.

Our mission is to simplify complex IoT components for every organization. We also provide dedicated support to ensure you derive maximum value from your IoT data.

### What sets us apart?

At the core of our philosophy lies a commitment to honesty and transparency, which we believe are essential for a successful collaboration. We approach every challenge with a mindset focused on exploring possibilities, ensuring our solutions are tailored to meet your organization's needs with unmatched flexibility. We also offer an exclusive Thingsdata portal that centralizes all our systems to provide you with a comprehensive and easily navigable overview. This allows for efficient management and action within one platform.

### Thingsdata: your gateway to better business solutions:

- Flexible contracts with no fixed term, adjustable and cancellable on a monthly basis
- Instant activation without any fees or minimum duration requirements
- No minimum order quantities required
- Billing only for activated simcards
- Consolidated management of multiple sim management systems through a single pane of glass

### Our custom-made portal features:

- Visibility into contracts and monthly billing (invoices)
- The ability to place orders and view current order statuses
- Alerts for network disruptions and updates on the latest developments
- Access to FAQs and instructional videos
- A streamlined ticketing system for prompt support

## The ultimate One Stop Shop for IoT solutions

As your comprehensive IoT solutions provider, we are dedicated to continual innovation in our services!

### Hardware

We stock routers and gateways from top-rated brands tailored for any IoT application.

Additionally, customers have the option to acquire our hardware through a Hardware as a Service model.

### Connectivity

Our SIM cards automatically connect to the strongest network available, ensuring reliable service. We offer a range of connectivity options, including M2M, LTE-M, and NB-IoT solutions, along with enhanced security through (private) APNs and VPNs.

### Data processing

At Thingsdata, we are here to assist you in choosing the ideal standard or custom-built IoT portal for efficient data collection, storage, reporting, and analysis.

Our dedicated support team is not only certified and experienced but also immediately available to assist you. They use the world's leading SIM management technology, Cisco Control Center, to resolve your queries quickly and effectively.
